

**Brighten up your day
with solar power....**

About us

We are a decade experienced solar developer and installer for residential, agricultural, commercial, industrial and utility scale markets. Our team is comprised of seasoned solar professionals and financial experts focused on one thing: deliver unmatched value to our esteemed customers.

Progen Renewables' integrated capabilities in engineering, design, power quality, installation and financing structures enable the delivery of superior clean energy solutions in the areas that matter most— quality, pricing and financing. Our approach provides an annual internal rate of return on their clean power investments of up to 25%. With the rising cost of energy and escalating environmental concerns, there has never been a better time to go solar.

Founded by Alfred Vinod Antony in 2013 with focus to promote solar photo voltaic power System. Progen has Successfully designed, installed and commissioned more than 50 MW solar photovoltaic power plants in India

OUR MISSION

Our mission is to aggressively drive the cost of solar power downward while maintaining first-class quality and service. By means of our lean and integrated capabilities, we aim to aid businesses worldwide to go green not only to reduce their carbon footprint but also make economic sense.

OUR SOLUTION

Progen Renewables has unique integrated capabilities in the areas of solar integration, supply chain management, design and engineering, financial structuring and six sigma quality assurance. Expertise in these many areas has enabled us to be lean and dramatically reduce installed costs relating to solar.

THE TEAM

Progen Renewables understands the intimate details to every component that results in optimal design, construction and financing of large power systems.

Our core team includes professionals with the following backgrounds:

- Project Finance and Structuring Expertise.
- Power Quality Engineers with vast experience in designing and engineering inverters and power systems.
- Civil/ Structural Professional Engineering know-how.
- Energy Auditors
- Installers with vast project experience.

PROGEN OFFERINGS

FOCUS SECTORS IN SOLAR PHOTOVOLTAIC POWER PLANTS

RESIDENTIAL SOLAR

Just think of us as your solar power concierge. Our team will take care of everything from design and permits to home inspections and solar panel installation. All you have to do is watch it come together. Progen provides on grid & off grid solar power plants.

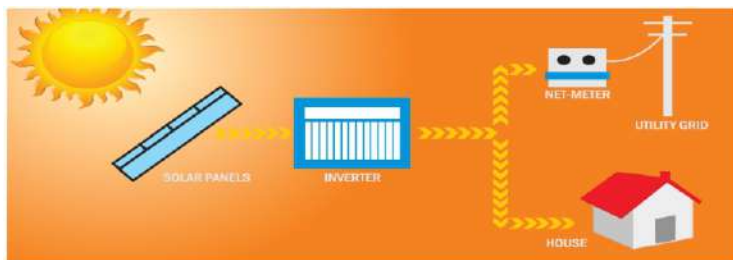

SOLAR OFF GRID POWER PLANT

- High efficient MPPT charger for maximum solar generation
- Zero change over time
- Digital display with power generation meter
- Maintenance free battery(optional)
- Remote monitoring system(optional)
- Starts from 100watts onwards

GRID CONNECTED ROOF TOP SYSTEMS:

- Inverter with higher efficiency
- Minimal maintenance
- Power plant-expandable at any time
- Auto-DG-Start up(optional)
- Net metering system(optional)
- Starts from 1KW onwards to MV range

UTILITY SCALE SOLAR

Progen Energy powers turnkey solution delivers the best value on commercial solar power installations. Our systems offers protection against high or volatile utility charges and create long term benefits for our industrial solar clients.

COMMERCIAL SOLAR

Non-polluting renewable energy resources to control green house gases is receiving impetus from the government of India. Ideally suitable for industries and commercial establishments. Progen is a part of the solar mission supporting the development and use of solar energy for power generation.

AGRICULTURAL SOLAR

Our solar water pumping solutions are versatile and suits any size/type of farm. It is completely automatic and maintenance free.

TRAINING

We understand that solar photovoltaic technology is the new technology to the society. With corporate social responsibility, we contribute meaningfully to the nation by providing the quality training to the aspiring solar entrepreneurs, solar vendors, and students in INDIA on the solar photovoltaic technology integration, installation and total project engineering management. The department of MSME recognized our quality and gave us responsibility of training the empanelled solar vendors in Tamilnadu. We are the channel partners of MSME for solar training program. The promoter of Progen Energy Solutions is a visiting faculty at the Rural Energy Centre, Gandhigram Rural Institute (a deemed university funded by the Central Government)

PRODUCTS

SOLAR WATER PUMPING SYSTEMS

PV arrays absorb sunlight radiation energy, convert it into electricity. Pumping inverter control and regulate the operation of the system. It transforms DC power generated by PV arrays into 3 phase AC power, and then drives the submersible pump. In accordance with changes of real time solar radiation intensity, the inverter can adjust the output frequency, to achieve the Maximum Power Point Tracking function (MPPT).

- Robust industrial grade inverter for high surge current
- Starts from 1HP onwards
- Suitable for open well and submersible pump
- Sharing of Grid Power on demand

SOLAR WATER HEATER

Solar thermal systems are fully integrated solutions with modular design allowing you to add more capacity to meet most hot water needs. Solar thermal systems utilize free energy from the sun to produce hot water.

- Greater heat absorption
- Maximum heat transfer with efficient heat transfer materials
- Available in evacuated tube and flat plate collectors
- Electrical backup heating with thermostat control(optional)
- Available from 100 Ltrs to 10,000 Ltrs
- Industrial pre heating solutions through CSTP
- Steam generation for laundries, cooking with Concentrated Solar Thermal Power(CSTP)

SOLAR STREET LIGHTS

Progen Solar Street Lighting Systems are raised light sources which are innovatively integrated with power generation, storage and maintenance system, LED lamp, battery, control electronics, Solar Photo Voltaic Module, Mounting structure and associated hardware. This integrated system is a modern lighting system for illumination of streets, squares, junctions, avenues and key intersections located in areas without access to the power grid.

- Solar module integrated design, long life
- No hassle of bulbs replacement
- Automatic dawn to dusk operation
- Eliminates visual fatigue and light pollution
- Better lumen output of 130 Lumens /Watt
- High efficient crystalline modules

SOME OF OUR UTILITY SCALE PROJECTS

GEA-BGR

Mehaboob Nagar, Telengana -2.5MW

ALLES SOLAR PVT LTD
Ramnagara, Karnataka –1MW
with Single Axis Tracking

SRI JAYA JOTHI CEMENTS PVT LTD
Kurnool, Andhra Pradesh - 10MW

MY HOME INDUSTRIES
Vishakapattanam,
Andhra Pradesh - 4MW

CREST
CHANDIGARH- 1MW

RAMA ENTERPRISES
Thippu Thoti, Karnataka-1MW
With Elevated Structure

JAGADEESH MARINE EXPORTS
Bhimavaram, Andhra Pradesh-1MW

COMPLETED ROOFTOP PROJECTS

PAALANA HOSPITAL
Palakkad, Kerala – 200KW

DHAYAPURAM RESIDENTIAL SCHOOL
Kattangal, Kerala -50KW

PRAJOTHI NIKETAN COLLEGE
Pudukad, Kerala - 50KW

BISHOP HOUSE
Palakkad, Kerala - 30KW

SRI SHAKTI COLLEGE OF ENGINEERING
Neelambur, Tamilnadu - 300KW

SAM TURBO INDUSTRIES PVT LTD
Neelambur, Tamilnadu - 120KW

OUR LADY CONVENT
Thrissur, Kerala - 30KW

SKL SCHOOL
Thirupur, Tamil Nadu - 32KW

**VIVEKANANDA VIDYALAYA
MATRICULATION HR. SEC. SCHOOL**
Thirupur, Tamil Nadu - 50KW

St. ALOYSIUS COLLEGE
Thrissur, Kerala - 40KW

VIMALA COLLEGE
Thrissur, Kerala - 100KW

VIDHYA MANDIR SCHOOL
Chennai, Tamil Nadu - 85KW
