

Promoter / Executive Profile – Alfred Vinod Antony

Alfred Vinod Antony is the **Managing Director of Progen Renewables Ltd.**, a leading renewable energy solutions provider specializing in solar photovoltaic (PV) projects across India. With **almost two decades of expertise** in the renewable energy sector, he has successfully designed, executed, and commissioned **over 200 MW** of solar power plants, including rooftop and utility-scale projects, across the country.

Under his leadership, Progen Renewables has established itself as a trusted EPC (Engineering, Procurement, and Construction) contractor and system integrator, delivering end-to-end solutions from concept to commissioning. Alfred's core expertise lies in **design, integration, and implementation of solar PV systems**, including **standalone, grid-connected, and hybrid wind-solar systems**. His work extends beyond commercial execution — he actively contributes to industry development by conducting **job-oriented skill development training programs** on solar PV design, fabrication, and integration for the **MSME sector**, fostering entrepreneurship and capacity building in renewable energy.

Before founding Progen Renewables, Alfred gained rich entrepreneurial experience as **Proprietor of Progen Energy Solutions**, where he provided consultancy and project management services for solar PV projects and training programs for MSMEs.

His career foundation is built on a strong background in IT and project management, having held key positions in global technology firms such as **iGate Global Solutions**, **Scintel Technologies (India & USA)**, and **Tata Infotech Ltd.** Over nearly a decade in the IT industry, he rose from Software Engineer to Project/Delivery Manager and Onsite Manager, gaining valuable expertise in supply chain management systems, high-level design, and project execution — skills that now inform his systematic approach to large-scale solar project delivery.

Alfred holds a **Master of Science in GIS/Civil Engineering** from **Virginia Tech, USA**, and a **Bachelor of Engineering in Civil Engineering** from **Coimbatore Institute of Technology**, Tamil Nadu. His unique blend of **technical expertise, project management skills, and passion for renewable energy** positions him as a visionary leader driving the transition towards sustainable energy solutions in India.
